

GLATT GMPC MULTI-PAN-COATER

Drum Coater

Glatt GMPC MULTI-PAN-COATER.

Multi-talented machine for research and development on a laboratory and pilot scale.

The Glatt Multi-Pan-Coater (GMPC) is designed specifically for research and development for coating tablets with aqueous or organic solvent solutions.

As an option, it is also possible to coat cores with sugar syrup. The Multi-Pan has a compact construction and is suitable for GMP, features making it especially appropriate as a universal Coater.

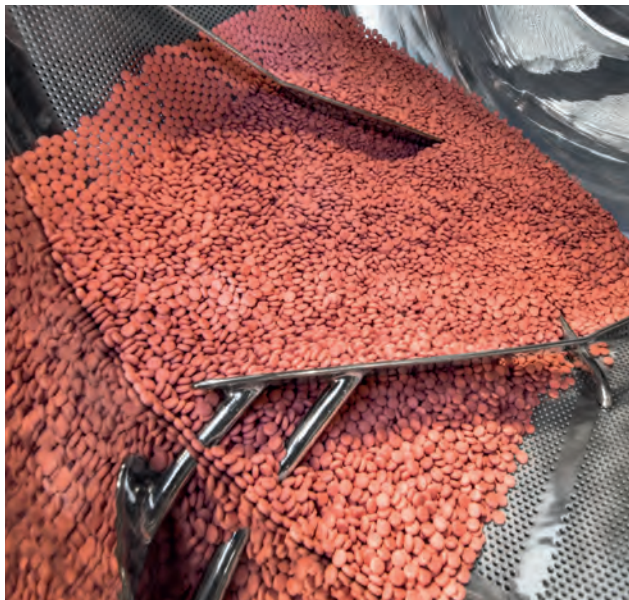

All necessary components including the air intake and exhaust air system, are integrated into the machine housing. The Multi-Pan can be easily installed as a pilot machine.

Front charging

Glatt GCSD nozzle

Tablet bed

Front discharge

GMPC II

The simplicity of drum change allows the processing of GMPC II batch sizes from 2,0 l bis 56 l.

The PLC control system records all necessary parameters, enabling the system to be scaled up to production plant size without any difficulty.
